-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 29-59 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 29, line 13, and in claim 39, line 12, "the peripheral rim" lacks a proper antecedent basis. In claims 50 and 52, line 1 of each, "the step of aligning" lacks a proper antecedent basis.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 29-59 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Bianchi et al., US 6,033,438. As illustrated in Figure 8, the stronger bone S defines a peripheral rim around the weaker bone W, and medial and lateral portions of the leading and trailing ends of each spacer overly this peripheral rim (column 6, lines 27-42). As seen from the implant tapering depicted in Figures 8 and 9, the trailing end of the implant is configured to generally conform to at least a portion of the natural anatomical curvature of the vertebral bodies. The cavity (column 3, line 42; column 17, lines 5-8) including a curved opening formed into a portion of adjacent vertebral bodies would have been inherent from the generally circular cylindrical form of the spacers and from the need to ensure sufficient load bearing and stability

via threaded engagement into bone (column 6, lines 14-26; column 8, lines 5-12 and 48-51; etc.).

Regarding claim 31 and others: column 3, lines 42-44; column 8, line 60 et seq.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

EP 0 392 076 A1: Figures 1-3; column 5, lines 30-32.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dave Willse, whose telephone number is 571-272-4762 and who is generally available Monday, Tuesday, and Thursday. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott, can be reached on 571-272-4754. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
